Dynamic Network Factory CEO Mo Tahmasebi Selected to Speak on Best Practice Storage Strategies at ISC West Conference

Presentation Will Provide Insight into Storage Management Strategies for IP Surveillance Technologies

LAS VEGAS – Mar. 27, 2009 – Mo Tahmasebi, CEO of Dynamic Network Factory (DNF) Corp., a cutting-edge technology company with seven enterprise storage-focused business units including DNF Security, has been selected to speak at ISC (International Security Conference) West. The conference, which will be held at the Sands Expo & Convention Center in Las Vegas, March 31 – April 3, 2009, brings together manufacturers, dealers/installers, system integrators, and corporate end-users of security products and services to learn, evaluate, and competitively source in a productive environment.

"Moving from Perfect Data Storm to Perfect Data Form with Effective Camera Management and Storage Strategies" is the topic of the presentation that Tahmasebi will deliver on Tuesday, March 31 at 1 p.m. in room 202 at ISC West. His discussion will focus on guiding installers, system integrators, IT professionals, end-users and solution providers through choosing the right storage strategies and systems for their IP surveillance installations.

"Today's surveillance requirements are complex. With so many challenges facing security professionals, it becomes difficult to design a robust security infrastructure," said Tahmasebi. "This interactive IP storage discussion will strive to educate attendees by sharing best practices, strategies, and applications, allowing them to see first-hand the benefits of digital video and IP surveillance."

For more details on Tahmasebi's presentation, please visit: http://iscwest2009.conferencepath.com/speakerlist/?action=showsessions&userid=34664

About Dynamic Network Factory

Dynamic Network Factory (DNF) Corp. takes pride in its innovative spirit, engineering excellence, and broad product line. DNF's seven business units focus on specific vertical markets and technologies to cover the business and government technology space. Since 1998, DNF has focused on delivering storage solutions, from direct attached storage for small business, to enterprise applications, networked storage, iSCSI and file servers in capacities from 1TB to 10PB. In 2006, DNF's acquisition of iSCSI pioneer StoneFly Networks expanded its storage portfolio to include enterprise-class iSCSI and storage virtualization technology. With the expertise of DNF Storage, DNF Systems and StoneFly, DNF Security leverages innovative storage and server technologies for mission-critical IP surveillance solutions.
